[About us]

Our drive and goal is the delivery of sustainable urban and transregional mobility solutions customized for your city, county or region!

As **[ui!] Urban Mobility Innovations**, we use the urban data experience of **[ui!]** to collect all existing data IT systems with the support of our cloud-based smart mobility platform. We apply AI-based analyses and make the data available for insight driven mobility services.

We have already gained considerable experience in the joint creation and introduction of mobility concepts as a "Trusted Advisor" and can offer project management for this purpose.

Our successful **[ui!] M2LIFE Product-Suite** provides support in achieving your targets. It enables you to tailor mobility to your citizen and local needs in all its facets.

Billing and payment tools are included, as well as on journey assistance to find the best mode of transportation.
